

Cyber | Cyber Kill Chain®

Cyber Kill Chain

THE CYBER **KILL** CHAIN®

Developed by Lockheed Martin, the **Cyber Kill Chain®** framework is part of the **Intelligence Driven Defense®** model for identification and prevention of cyber intrusions activity. The model identifies what the adversaries must complete in order to achieve their objective.

The seven steps of the Cyber Kill Chain® enhance visibility into an attack and enrich an analyst's understanding of an adversary's tactics, techniques and procedures.

With 'Hands on Keyboard' access, intruders accomplish their original goals

COMMAND & CONTROL (C2)

Command channel for remote manipulation of victim

The Cyber Kill Chain®: A LOCKHEED MARTIN OVERVIEW

For more than a decade, Lockheed Martin's Intelligence Driven Defense® and Cyber Kill Chain® methodologies have helped our customers defend their most sensitive networks. It is because of this proven framework, superior technology, and hundreds of skilled analysts that Lockheed Martin remains a global leader in cyber innovation.

How to Get a Job in Cybersecurity: Career Advice

Interested in cybersecurity? Not sure what to study or how to prepare? Our Lockheed Martin experts share advice about how to get a cyber job.
